

# Spitfire Machine Pistol

The Spitfire is one of our most authentic models. Compact, it is great for outdoors re-enactments.

It has a metal construction. More it has a full trigger mechanism. It also comes standard with a generic Red Dot scope.

Pictured here is the optional Stock & Shroud. You can add either a muzzle shroud which looks a bit like a silencer, or fixed stock. Or you can add both for a dramatic effect.

Normally associated with a red dot scope, once the accessories are added you can fit a small telescopic scope if you want.
