

Ref Gun (Referee's Rapid Re-set Pistol)

When creating a battlefield or Battlefield Live arena, theming is paramount. You want your customers to suspend disbelief when they are at your attraction. You want them to really get into the game. So we believe it is really important to have your re-set equipment stay in line with your high-tech or military theme.

So a referee's pistol is way more cool than a simple referee box. From our experience the Ref Gun quickly becomes the most fascinating gun in your arsenal because it can ONLY be used by the referees. Players love it.

The Ref Gun is your rapid re-spawn tool. In other words it allows you as the umpire to rapidly re-set players to their last configuration enabling very fast game turn arounds.

This is particularly useful if you have 200 or more people playing at once or are operating an indoor laser skirmish event.

You need one ref gun per squad, therefore we recommend a minimum of 2 referee pistols per order.

| GUNS SPECS | REF GUN |
